## CAS-TWAS International Workshop

# Climate Change Challenges and Sustainable Development in the Global South

Beijing, China  
June 24-26, 2025

## Background

In the context of global warming, more frequent and intensified extreme weather and climate events have posed significant global challenge on the social and economic sustainable development, particularly for developing countries in the Global South. This workshop aims to bring together TWAS Young Affiliates, alumni and regional young scientists to address these challenges and explore innovative scientific solutions, through fostering a platform for multilateral cooperation, and enhance the capacity building for young scientists from Global South to mitigate climate impacts, thereby contributing to the global sustainable development agenda.

## Sessions
